

Solutions for Oncology

My Care PlusSM

A personal connection to your patients to provide them with a more informed and empowered journey.

Give your patients the opportunity to join the thousands of others already benefitting from My Care Plus, a patient portal developed by McKesson Specialty Health. My Care Plus allows you to enhance relationships and improve communication with your patients through an easy-to-navigate, customized web portal. Designed especially for oncology clinicians and their patients, My Care Plus acts as an extension of your practice to support the needs of your patients and give them a better understanding of their care.

Highlights:

My Care Plus provides your patients with online access to their clinical information through a secure web portal, personalized with your practice logo. After visiting your practice and providing the necessary consents, patients have the opportunity to enroll in My Care Plus and gain easy access to their personal health records (PHR) online. Patients can review, save and print their health information and share it with family or caregivers without having to request the information directly from your practice. My Care Plus gives your patients 24/7 access to their PHRs, increasing convenience and potentially reducing the number of calls your care team receives. The information available includes:

- Detailed diagnosis
- Health concerns
- Medications
- Allergies
- Approved clinical results

Meaningful Use Requirements Made Easier

The highly personalized My Care Plus patient experience is generated from the information entered into iKnowMed electronic health record (EHR) and is included as an added benefit to all iKnowMed implementations. In addition to providing your patients with a closer connection to your practice, My Care Plus is certified for Meaningful Use, making it easier for your practice to meet Stage 1 objectives and qualify for associated incentives for relaying patient information electronically¹.

Build stronger relationships with your patients and improve practice efficiencies with My Care Plus.

Learn More Today

To learn more about My Care Plus, call 800.482.6700, option 4, email us at msh.providers@mckesson.com or visit www.mycareplusonline.com.

¹A practice must meet a number of requirements in order to qualify for Meaningful Use incentive payments. McKesson Specialty Health does not guarantee such results by use of the My Care Plus portal
